THE $50 AI INFLUENCER PLAYBOOK

Less guessing. *More creating.*

Your AI creator, step by step. Choose a topic. Build a character. Make a useful post. Test an offer. Follow the order and know what to do next.

$50 for a clearer path: instructions, templates, and tools you can reuse. Software costs are separate.

01 / Find your promise
Know who you help and why.

02 / Build your series
Make the next post worth waiting for.

03 / Test your offer
Measure action beyond the like.

YOUR MAP

Six moves. *One clear system.*

Do one step at a time. Finish its checklist before moving on. Keep this open while you work.

01
Find the lane
One person. One problem.

02
Build the persona
A recognizable visual identity.

03
Check the basics
Labels, assets and trust.

04
Earn the pause
A hook with a real payoff.

05
Create the next step
Turn interest into intent.

06
Test and refine
Keep what earns a response.

BEFORE YOU BEGIN / SET UP YOUR WORKSPACE

Four tools. One folder. Start simple.

1. Writing: open ChatGPT or Claude for scripts.
2. Images: choose a generator that accepts a character reference.
3. Video: open Canva or CapCut to assemble your reel.
4. Tracking: open Google Sheets or Excel for your results.

Done when: your folder exists and you can open each tool.

Create a folder named "AI Creator."
Inside it, make: **01 Character**, **02 Images**, **03 Videos**, and **04 Results**.
Start with one social platform. Choose tools you can access; check their costs and commercial-use terms.

Your first win: write one useful promise, draft one reel, and finish the launch checklist. Start there.

01 / POSITIONING

Why should someone *follow this persona?*

Pick one person to help and one problem to solve. Use the example below as your guide.

MAKE THE PROMISE SPECIFIC

Broad: “An AI creator sharing travel tips.”

“Beautiful weekend escapes for people with ordinary budgets.”

Example positioning, not a claim of personal travel experience.

WRITE YOURS: I HELP [AUDIENCE] GET [BENEFIT] THROUGH [SERIES].

I help first-time travelers plan affordable weekends through one destination guide every week.

Do these four things.

- [ ] Write who you help. Example: first-time travelers planning a weekend away.
- [ ] Search your topic on Instagram or TikTok. Save five accounts that help the same audience.
- [ ] Open each account. Save three useful posts. Write down the opening line and what the post teaches.
- [ ] Show your one-sentence promise to three people in that audience. Ask: “What would you expect me to post?”

Deliverable: one sentence you can put in the bio today.

02 / IDENTITY

A familiar face.
A recognizable point of view.

Done when: you have a character brief, one reference image, and three matching scenes.

01

Write the character brief

Copy the prompt below into your AI assistant. Fill in the brackets. Save the answer as “My character brief.”

02

Approve one reference

Use an image tool with character-reference support. Generate a fictional adult. Pick one image and save it as your master reference.

03

Render, compare, approve

Attach the master reference to each new image request. Make three separate scenes. Compare the face, hair and distinctive features.

▼ Open the copy-ready character prompt

Create a character brief for a fictional adult AI creator who helps [audience] with [problem]. Give me: a name, a one-line bio that says AI-generated, three personality traits, three weekly content topics, and a consistent visual description. Use [colors and style]. Do not copy a real person or invent personal product experiences.

▼ Copy the image prompt for your next scene

Use the attached fictional character reference. Keep the same facial features, hair and distinctive marks. Create one vertical scene of the character [action] in [setting]. Use [lighting and colors]. Leave space for a short text overlay. Do not add text, watermarks or extra panels.

> **Quality gate:** reject blurred upscales, contact-sheet grid lines, changing facial features, watermarks, and awkward crops. Keep rejected images as briefs for a new render.

03 / BEFORE THE FIRST POST

Build trust into *the first impression.*

A clear identity and honest claims make the account easier to understand.

Your launch checklist

- [ ] My bio clearly says the persona is AI-generated.
- [ ] I checked current platform rules and applied required AI labels.
- [ ] I own or have permission to use each asset, voice and likeness.
- [ ] Sponsored, gifted and affiliate content has clear disclosure.
- [ ] Claims are supportable. The persona does not pretend to have used products or attended events.
- [ ] Assets pass the quality check; provenance metadata is preserved.
- [ ] I reviewed Account Status, eligibility and my link destination.

0 of 7 launch checks complete

MAKE IT EASY TO UNDERSTAND

AI-created persona.
Real, useful ideas.
Clear recommendations.

Example bio

AI travel muse · budget-friendly weekend ideas
One useful escape, every week
Get the weekend planner ↓

Example generated-scene caption

AI-generated scene. Check current location details before booking.

For paid content

State the commercial relationship clearly and prominently. Add the platform's disclosure tools where required.

Verify rules for your platform and audience. This checklist is a working aid, not legal clearance.

04 / HOOK STUDIO

Earn the pause.
Deliver the payoff.

A hook is the first line of your post. It tells someone why they should keep watching.

Build your next opening line

YOUR TOPIC

weekend escapes

CHOOSE THE ANGLE

Curiosity · open a useful question

3 ideas for weekend escapes. Which one fits you best?

TEST ONE ANGLE AT A TIME

Only promise a payoff your video actually delivers. Use proof you can show; skip invented results.

A REEL YOU CAN BUILD TODAY

EXAMPLE / TRAVEL

HOOK

“3 weekend escapes. Which one fits your budget?”

Show three real destinations. Compare a useful cost or planning detail for each. Explain what changes the price.

> **Payoff:** a clear comparison viewers can use.
> **Next step:** “Get the weekend planner through the link in my bio.”

Verify prices and locations. Label generated scenes. Use a comment keyword only when its delivery flow is working.

01 / OPEN

Say the promise

First 1–2 seconds: a specific question or useful result.

02 / SHOW

Make the steps visible

One idea per shot. Number the items. Cut the filler.

03 / RESOLVE

Close the loop

Deliver the answer you promised. Make it worth saving.

04 / INVITE

Offer one next step

Save, follow, or get the checklist. Pick one main action.

▼ Make the reel: follow these exact steps

1. Open Canva or CapCut. Create a vertical **1080 × 1920** video.
2. Import three approved images. Put them in order on the timeline.
3. Add your hook as text on the first scene. Start with about two seconds.
4. Add one useful tip to each scene. Allow enough time to read it.
5. Add a final card: “Get the free [checklist] through the link in my bio.”
6. Use your own voice or licensed audio. Keep text away from the screen edges.
7. Export an MP4. Watch it on your phone. Fix tiny text, awkward cuts or wrong facts.
8. Upload to your chosen platform. Add required AI and commercial labels. Publish and record the post link.

Done when: your first video is live and your checklist link works.

▼ What to change when a post underperforms

WHAT ARE YOU SEEING?

People leave immediately

Rewrite the opening around one concrete benefit. Show the result or useful comparison immediately. Test against the previous opening.

05 / THE OFFER

Give attention *somewhere useful to go.*

An offer is something people can buy. Start with one small resource that solves the problem you post about.

Useful post Earn interest	→	**Free resource** Deliver a small win	→
Email opt-in Ask permission	→	**Relevant offer** Solve the next problem	

Start with one small offer.

Travel ideas → weekend itinerary template.
Style guides → capsule wardrobe planner.
Creator education → content planning workbook.

Keep the free resource useful on its own. Explain what the paid resource adds. Disclose affiliate relationships.

▼ Copy a clear call to action

Your next step is already mapped out. Get the [resource] to turn [problem] into [specific next action]. See exactly what's included before you choose.

▼ Build the free-resource link: step by step

1. Open Canva or a document editor. Make a one-page checklist that matches your video.
2. Export it as a PDF. Test that every link opens.
3. In an email service such as MailerLite, create a signup form. Say what people receive and whether they are joining your emails. Include your privacy notice.
4. Add the PDF link to the welcome email or signup thank-you page.
5. Publish the signup page. Put its URL in your profile's link field, if available.
6. Test with your own email. Confirm the signup and open the delivered PDF.

Done when: someone can go from your profile to the delivered checklist. Exact menu names vary by service.

Later: test brand work, licensing or platform monetization when your account qualifies. Confirm current eligibility in the app.

SCENARIO PLANNER · ILLUSTRATIVE ONLY

What would your goal require?

MONTHLY GROSS REVENUE GOAL ($)

1000

OFFER PRICE ($)

29

VISITOR-TO-SALE RATE (%)

2

Sales needed / month **35**

Offer-page visits needed **1,750**

Hypothetical inputs, not an earnings forecast. Gross revenue excludes fees, refunds, taxes, and production costs. Replace the conversion rate with your own measured data.

06 / THE 90-DAY EXPERIMENT

Grow what works. *Change what doesn't.*

Use these milestones to guide experiments. They are planning targets, not platform rules or promised results.

DAYS 01–30

Find a repeatable series

- Pin your promise, best example and next step.
- Test three recurring formats.
- Compare retention and shares with your own median.

Review at day 14
If ten posts show weak openings, change the hook and first shot.

DAYS 31–60

Build a reason to return

- Repeat the format that gets the best response.
- Number episodes and tease the next useful topic.
- Offer a free checklist in exchange for an email, with clear signup consent.

Review at day 45
Views without follows? Clarify the series promise. Few opt-ins? Improve the resource and invitation.

DAYS 61–90

Test willingness to pay

- Release one focused offer.
- Make a one-page brand sheet: audience, example posts, actual views and contact details.
- Pitch ten relevant brands with specific ideas.

Review at day 90
No sales? Talk with ten potential buyers about the problem, offer and price before expanding.

Your weekly routine: open post analytics. Record views, average watch time, shares, new followers, email signups and sales. Pick your strongest post. Make a new version with one change.

▼ Download the research and weekly review worksheets

CSV files open in Excel, Google Sheets, or Numbers. Add your own observations; these templates contain no invented results.

KEEP THE EVIDENCE CLOSE

Good decisions need *current information.*

The supplied edition includes unverified rules and estimates. Use official sources before relying on eligibility or disclosure details.

▼ Official rules and source notes

TikTok: AI-generated content

TikTok: Creator Rewards

Instagram Help Center

FTC: Endorsement Guides

Check each account’s current monetization and recommendation status in the platform. This revision does not independently verify the linked pages, dated policy claims, follower thresholds, or AI-persona eligibility. Reported creator earnings were omitted because they do not establish expected results.

The five-account starter research task, three-person feedback check and 90-day checkpoints are practical exercises, not validated performance guarantees. No follower or revenue result is promised. General educational information; not legal or financial advice.

CLOSE THE TABS. TAKE THE FIRST STEP.

One promise.
One reel.
One useful next step.

The value of this playbook is time saved: fewer scattered notes, fewer decisions, and one clear next action. Write your promise. Then follow the steps.

WRITE MY PROMISE

Deeper, Not Bigger

Adapted from The AI Influencer Playbook supplied by the user. Your promise and checklist progress stay in this browser when local storage is available. No form data is sent anywhere. Downloaded HTML works offline; source links require internet access.
